

Welder qualification, finally under control

Most welding shops run on a mix of spreadsheets, paper folders and memory. That works until the inspection arrives. WeldDoc replaces that chaos with one simple system: every welder registered, every certificate generated, every expiry tracked. No folders. No last-minute panic. Just clean records, ready when you need them.

- Know who's expiring before the auditor does
- Scan the QR code. Qualification confirmed in seconds.
- Full history — qualifications, docs, approval range
- Works on phone, tablet or desktop — no installation

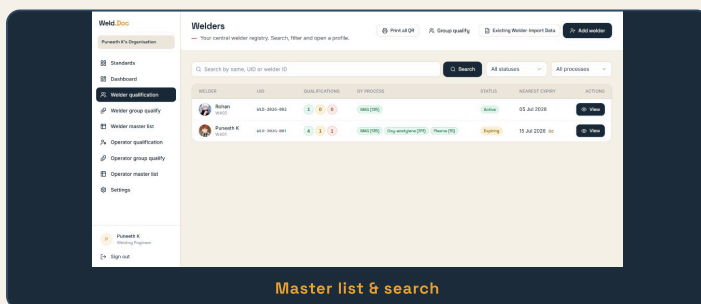

THE CHALLENGE

- Paper certificates that go missing before an audit
- Revalidation deadlines discovered only after they pass
- No way to prove qualification without being in the office

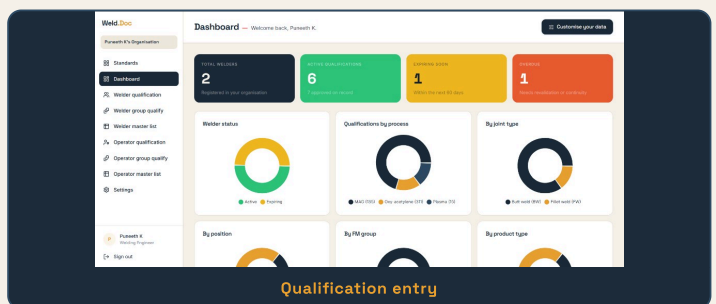

OUR SOLUTION

- One registry — every welder, every document, always current
- Certificates in 3 minutes, not 3 days — ISO-compliant PDFs
- QR link lets auditors verify on the spot. No account needed.

SEE IT IN ACTION

Master list & search

Qualification entry

KEY FEATURES

Welder & operator registry

UID, photo, plant ID, QR profile

Qualification wizard

ISO 9606-1 & ISO 14732 guided entry

Certificate generation

Auto range of approval, stamped PDF

ID cards

Wallet-sized, print-ready with QR code

Test result management

NDT reports, pass/fail, attachments

Document storage

Signed certs, legacy uploads, reports

6-month, 2-year & revalidation rules

Search & master list

Filter by process, status; PDF/Excel export

Dashboard & reports

KPIs, charts, qualification gaps

Role-based access

Organisation-scoped team permissions

HOW IT WORKS

01

Add the welder once

02

Log the test results

03

Attach test reports

04

Range auto-calculated

05

Certificate is ready

06

Expiry tracked for you

3 min

Certificate generated

30 sec

QR audit verify

0 paper

Complete digital trail

WHY WELDDOC**Built for qualification. Priced for your shop.**

Big platforms charge for weld mapping, ERP connectors and features most shops never touch. WeldDoc does one thing really well — keeps your welders qualified and your records audit-ready. That's it. Honest pricing, fast setup, no training course needed.

WHO USES WELDDOC**Welding Coordinator**

- Add a welder and log test results in under 5 minutes
- Certificate is generated automatically — no typing, no formatting
- Get reminded before a qualification expires, not after

Quality Manager

- Full qualification records with supporting documents, one click
- Export master lists for client or third-party audits instantly
- Every change logged — complete audit trail, always

Plant Owner / Director

- Dashboard shows active, expiring and expired at a glance
- No audit surprises — team is always working from live data
- Manage multiple sites from one login
