

Welder qualification, finally under control

WeldDoc digitises welder and operator qualification — registry, certificates, ID cards, QR verification and expiry alerts. ISO-standard compliance without enterprise ERP complexity.

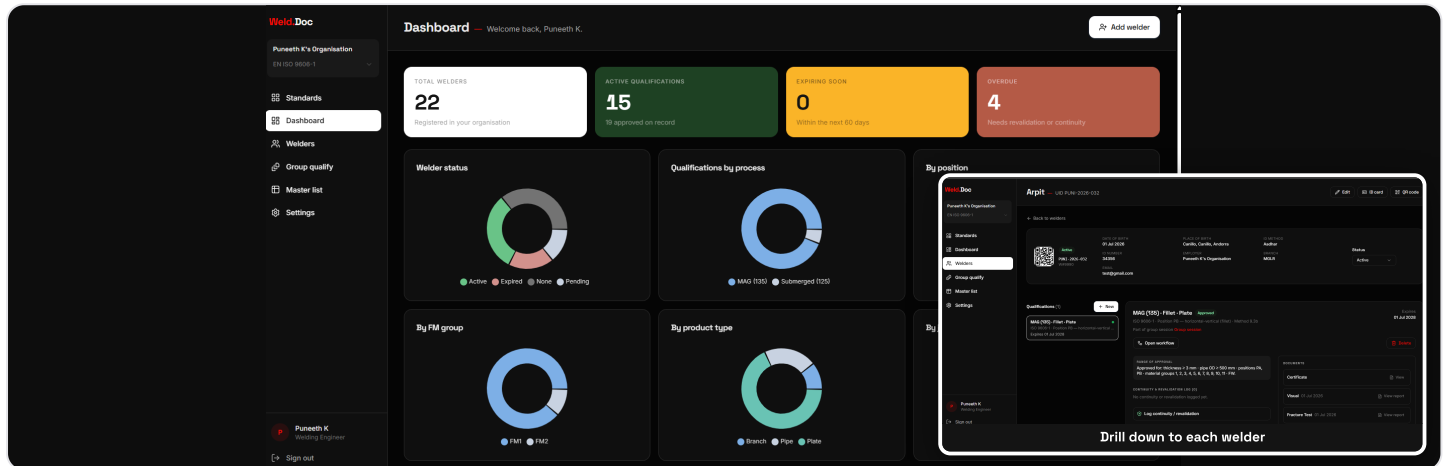

THE CHALLENGE

- Manual records in spreadsheets and paper folders
- Missed continuity and revalidation deadlines
- Slow audits — lost or outdated certificates

OUR SOLUTION

- One registry for welders and operators
- Certificates and ID cards in minutes
- Expiry alerts and QR auditor verification

DASHBOARD & ANALYTICS

- See compliance status at a glance
- Full profile, approval range & documents
- Flag overdue before your next audit
- QR verify · certificate · ID card · ISO 9606-1

KEY FEATURES

Welder & operator registry
UID, photo, plant ID, QR profile

Qualification wizard
ISO 9606-1 & ISO 14732 guided entry

Certificate generation
Auto range of approval, stamped PDF

ID cards
Wallet-sized, print-ready with QR

Test result management
NDT reports, pass/fail, attachments

Document storage
Signed certs, legacy uploads, reports

Expiry tracking
6-month, 2-year & revalidation rules

Search & master list
Filter by process, status; PDF/Excel export

Dashboard & reports
KPIs, charts, qualification gaps

Role-based access
Organisation-scoped team permissions

HOW IT WORKS

01
Register welder

02
Enter test details

03
Upload reports

04
Auto approval range

05
Generate certificate

06
Track renewals

Focused beats bloated

Enterprise platforms bundle weld mapping and ERP workflows. WeldDoc specialises in qualification management — faster setup, clearer UX, and pricing that works for Indian fabrication shops.
